Meet ParaglideJS

inlang

Message Source

```
{
    "currentLanguageTag": "The current language tag is '{languageTag}'.",
    "greeting": "Welcome {name}! You have {count} messages."
}
```

Usage

```
import * as m from "./paraglide/messages/en"
m.
    [⊘] currentLanguage…    const currentLanguageTag
    [⊘] greeting
    [⊘] hello
im  [⊘] missing_in_german
im  [⊘] with_backtick
```

Compiled output

```
/**
 * @param {{ languageTag: NonNullable<unknown> }} params
 * @returns {string}
 */
/* @__NO_SIDE_EFFECTS__ */
export const currentLanguageTag = (params) ⇒ `The current language tag is "${params.languageTag}".`

/**
 * @param {{ name: NonNullable<unknown>, count: NonNullable<unknown> }} params
 * @returns {string}
 */
/* @__NO_SIDE_EFFECTS__ */
export const greeting = (params) ⇒ `Welcome ${params.name}! You have ${params.count} messages.`
```
