# Advantages

- Fully Typesafe

- Automatic code-splitting

- Unused message removal

- Compile-time Fallbacks

- Minified message keys

```
<h2>{$t('common.page', { pageName })}</h2>
<p>{$t('home.content')}</p>
```

# Drawbacks

- No reactivity

```svelte
<script>
  export let data;
</script>

{#key data.lang}
  <slot />
{/key}
```

- Lazy loading locales is awkward
